

**NEVADA**

WHITEPAPER

## Introduction

Nevada is a pioneering Binance Smart Chain (BSC) token that will let you partake in a good investment, with the options of staking, buybacks and NFT. We prioritize the audit to be held by CertiK. Our team also develops an online-based game with the concept of betting for those who invest the tokens. Nevada is structured with the concept of a low-tax contract, which enables people to do safe and stable transactions.

Nevada's various games will be provided to accommodate risk-takers out there, and play their hearts out!

## Mission and Vision

### Mission

Our team consists of remarkable game developers and marketers. We are determined to create the best experience in playing betting games with the BSC community, prioritizing security, fairness, and profitability.

### Vision

In Nevada, we believe that betting is not always associated with total loss. Taking risks can also be safe, as we pour that belief into a secure, fair, and high percentage returns through our platform. Everyone has the same chance of gaining high returns. Simply by holding our tokens, each holder has the same possibility of gaining from staking the token.

## Disclaimer

Nevada, including but not limited to the entire project, currency, website, smart contracts, and any applications mentioned in this concept paper ("NEVADA"), is not a regulated, unregulated, or exempted financial or payment service in any jurisdiction. Any terminology used in this Whitepaper, on the Website, or inside the app is intended only as a guideline, with no elective or legal meaning of the same terms in a regulated and/or financial environment. This Whitepaper does not constitute a contract or any other kind of contractual arrangement, nor does it constitute an invitation, solicitation, or offer to invest in Nevada, or to purchase or utilize Nevada in any manner with the expectation of profit. Before and after accessing and/or reading this Whitepaper or the Website, and/or utilizing any part or aspect of Nevada, any user represents and guarantees that they have obtained necessary technical, administrative, regulatory, and legal counsel. The user acknowledges and accepts that accessing, acquiring, or using any blockchain and/or crypto system, token, platform, software, or interface carries a high risk, and further disavows any claim of any kind against any community member directly or indirectly involved with Nevada for any damage suffered, including total loss.

## Ecosystem

### BSC (Binance Smart Contract)

BNB powers hundreds of projects running on the BSC. You can use it in DeFi, liquidity pools, DEX trading, or as a payment for NFT marketplaces. The BSC ecosystem is using Proof of Staked Authority (PoSA) consensus powered by validators and delegators.

### Transaction Fees

BSC blockchains use BNB as gas for transaction fees, which is much less than Ethereum gas. This allows investors to invest without worrying about incurring fees.

### Transaction Rate

Binance also handles around 100 transactions per second (TPS) compared to Ethereum, which is 15 transactions per second.

### Growth Opportunity

We think that by developing projects on BSC (a much younger network), there will be lower gas fees and faster transactions per second than Ethereum. We would be able to grow and broaden our exposure to the cryptocurrency sector.

## Staking

We offer an outstanding amount from staking, which is beneficial for our long-term holders.

## Nevada Playroom

The first project that will be launched on our ecosystem is the Nevada Playroom. This website will allow the investors to play games and enter tournaments. The playroom has an initial target of more than 1000 games.

## NFT Marketplace

Another exciting project, is the creation of a NFT marketplace, where artists can sell their beautiful artworks. This exchange will have a very small transaction fees and the Nevada token will be used as a payment gateway. We genuinely believe that creating a utility for our token will ensure its sustainability.

## Audit Summary

The InterFI team will perform a line-by-line manual analysis and automated review of our smart contract. The smart contract was analyzed mainly for common smart contract vulnerabilities, exploits and manipulation hacks. For the detailed understanding of risk severity, source code vulnerability, and functional test, kindly refer to the audit. While the Audit happens, the token contract will not be deployed on any blockchain: the smart contract can be modified, altered or developed by the auditor.

## Tokenomics

# 1,000,000,000

## Total Supply

### 3%

#### TOURNAMENT

Several game tournaments with big prize

### 2%

#### PROJECT

All platform maintenance

### 2%

#### MARKETING

Funds to promote Nevada

### 2%

#### AUTO LIQUIDITY

Sustaining liquidity pool and help the project economic wise

## Features & Utilities

### Website

The web interface enables users to play games and claim their accumulated rewards. The interface also presents information on the status of ongoing match, games that are open for betting, and schedule of upcoming championship. Users will be able to choose from multiple types of games.

### Safety

Nevada token aims at unlocking liquidity in smart assets through an end-to-end decentralized ecosystem, improving on current tokens.

### Transparency

Nevada will become a long-term investment token since they can be used to play online betting games. There are table games, random-number games and virtual gaming machines. People can find their favorite ones, such as roulette, blackjack, slot machines and many more. They also can be checked in real-time and have detailed logs of all transactions.

### Evolution

Nevada is a community-built crypto currency operating in the growing and fast-paced digital currency space.

## Team Board

Nevada Token has a team of developers, designers and marketers who working tirelessly to establish, grow, and maintain the community

## Values

### Community

Nevada is one of the most groundbreaking groups in cryptocurrency, developing organically at an outrageous pace. We believe that community is the core component of success. Community is prominent, and Nevada makes the effort to gather people from all over the world.

### Transparency

Nevada is a maintained community and supports decentralized tokens. We believe that the foundation of our projects is built around safety, open communication, trust, transparency, and community advice. Our crew members are dedicated to keep connected in the community 24/7 through our official Telegram channel.

### Trust

Nevada is audited by InterFi Network. The majority of the LP tokens have also been locked. Most of our crews are well-known in the BSC community. We ensure that our developers are available to interact with the community on a daily basis.

### Sustainability

Nevada aimed to stay. The decentralized community is encouraging and embracing long term growth of the ecosystem. The team is determined to provide real world use cases and higher benefits that are parallel with ephemeral trends.
